

Mastery-Driven, Job-Embedded

Learning in EPIC Academy is mastery-driven. Not only can you learn at your own pace, you can practice until you master skills. Many of the learning quests provide you opportunities to apply what you're learning to *your* classroom with *your* students! Along the way, you'll get feedback from colleagues and professional development leaders.

PD Designed *by* Teachers *for* Teachers

In EPIC Academy, you'll have the opportunity to experience learning quests designed by your colleagues. One of the most powerful experiences for professional growth occurs when teachers learn from each other, sharing experiences and resources. As you explore these quests, perhaps you'll be inspired to become a quest designer yourself?

Ready to Begin Your Adventure?

Space Is Limited!

EPIC Academy is built in Rezzly, a subscription-based learning management system designed for gamification of learning. We have a finite number of player slots available! If you'd like to participate follow the signup instructions below.

Sign Up Today!

Want to sign up? Simple visit the address below and complete the application. Once approved, you'll receive further instructions on how to start your first quests!

EPIC ACADEMY

AN ADVENTURE IN PROFESSIONAL DEVELOPMENT

EARN BADGES!
LEARN AT YOUR OWN PACE!
EARN CEUS!
QUEST BASED!

EPIC Academy is an online professional development experience in which *you* have choice about *what* you learn and *when* you learn it.

Quest-Based Learning

Learning in EPIC Academy is broken down into small mini-lessons called quests. Quests build on each other allowing you to apply what you previously learned as you explore topics. You can go as deep as you want. Completing quests unlocks new ones to explore!

Earn Your Badges!

Badges, or micro-credentials, are a new way of showing the world the skills you've mastered. In EPIC, you'll earn digital badges that can be displayed on your teacher web pages, email signature, or in social media. You'll also earn physical badges that you can display outside your classroom for your colleagues, parents, administrators, and students to see!

A Social Learning Experience!

EPIC is also a social learning experience. Learn from your fellow players as you share and reflect as an educator.

Fun PD?

EPIC Academy also has hidden/mystery quests and challenges that encourage you to explore and engage both with the learning and your fellow players.

Earn CEUs As You Accumulate Experience Points!

In addition to earning badges, at each step along the way, you'll earn experience points, also known as XP. As you earn experience points, you'll "level up" in the class earning new ranks and unlocking new opportunities. Experience points translate into CEUs that apply toward maintaining professional licensure.
